

Sidewalk Project

Presented by the Sidewalk Prophets

Why we chose this project/What is the purpose

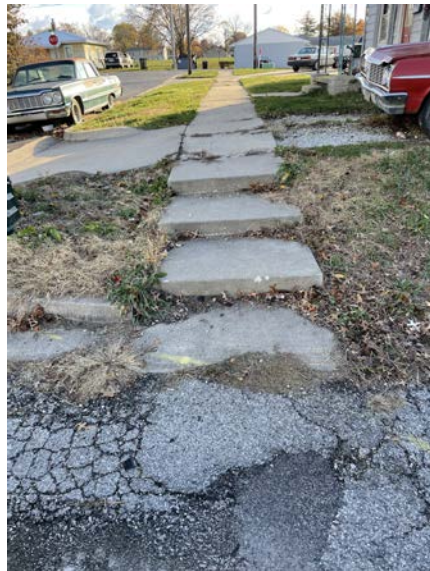

We wanted to take part in helping our community in any way the possible. The idea was proposed to our class by a representative from Kirksvilles local government. Using our class as a means to survey the sidewalks throughout the community. A simple, and yet important task that was perfect for the theme of our class as well as our goal to assist the community. That is why this is one of the many projects that our class as a whole set out to accomplish.

The purpose of this is relatively self explanatory, that being to help the community by surveying the sidewalks. In order to complete this task we were given a grading rubric to rate the sidewalks as we walked them. In the end we hope that our contribution helps the city of Kirksville in a practical way. So that they know what sidewalks need repairing and what are in good condition. Saving money and time.

Smith Street

- Grade: B-
- Feedback:
 - Uneven sidewalks
 - Prolonged gaps with patches of grass in between
 - Not wheelchair accessible

Patterson Street

- Grade: D
- Feedback:
 - Extreme cracks in almost every block
 - Narrow at points
 - Uneven with grass patches growing

S. Mulanix Street

- Grade: B+
- Feedback:
 - Inadequate Width Throughout
 - Slightly Broke
 - Large Gaps and Cracks

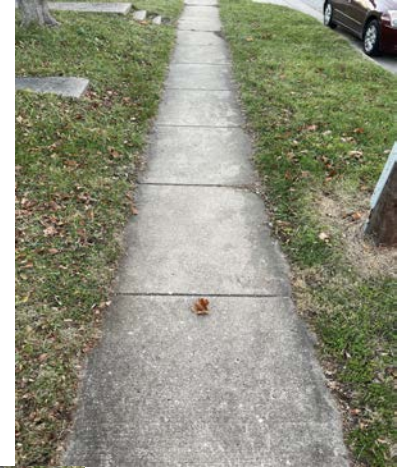

West Randolph Street

- Grade: N/A
- Feedback
 - This street received no rating as there were no sidewalks.

East Randolph Street

- Grade: A-
- Feedback:
 - Mild Grass Growth
 - Slightly Uneven
 - Minor Problems, all in all in decent good condition

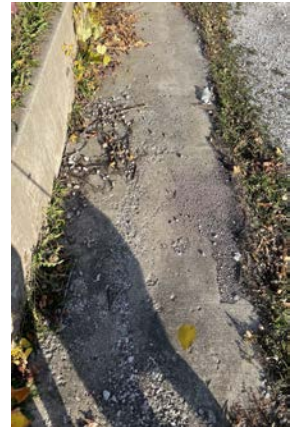

Elson Street

- Grade: F
- Feedback:
 - Width
 - Large Cracks
 - Lots of Cracks
 - Uneven Height
 - Tripping Hazard

Michigan Street

- Grade: B-
- Feedback:
 - Cracks
 - Grass growing in Cracks
 - Uneven height
 - Ends abruptly at Bus Stop
 - Width

First Street

- Grade: F
- Feedback:
 - Cracks
 - Faults
 - Pedestrian Crossing
 - Obstructions
 - Missing sidewalk
 - Not wide enough

High Street

- Grade: F
- Feedback:
 - Cracks
 - Aesthetic (broken wall)
 - Missing tiles

S. 6th Street

- Grade: F-
- Cracks
- Missing Slabs
- Large Faults
- Weeds

S. 5th Street

- Grade F-
- Cracks
- Debris
- Weeds

W. Filmore

- Grade A-
- Some driveways in disrepair
- One sided

W. Scott

- Grade C
- Some weeds
- Some cracks
- Gravel replacing concrete in certain areas

E. Scott

- Grade B
- Trash
- Some gaps between slabs

Our Report

The main problem sidewalks are on Elson Street, First Street, High Street, South 6th Street, and South 5th Street. These were the sidewalks that received failing grades and are in dire need of repair. We believe that the city should focus on fixing these sidewalks first as they are the ones that need the most work. The quality of walking, running, and biking will greatly improve when these sidewalks are repaired and maintained.

The secondary problem sidewalks are on Patterson Street, Smith Street, Michigan Street, and South Mulanix respectively. These sidewalks received passing grades but are in need of crack repair mostly. These sidewalks should be focused on after the main problem sidewalks have been repaired.
